Timestamp	What are the top needs you see for Innovation as a community?	What is the #1 outcome you want for a student who attends Innovation?	What would you as a staff member need to support implementation of an exemplary project?
10/16/2022 19:23:35	Improving SOL scores for reading, math, and science; Strengthening SEL skills	A strong growth mindset foundation that the student can apply to any and all challenges	Thorough understanding of the goals and instructional expectations (including time commitment, resources, etc) as well as adequate professional development to ensure consistency and fidelity school-wide
10/16/2022 19:56:14	strengthened tier 1 instruction, closing academic performance gaps, continuing to develop responsive classroom practices	Academic success	strengthened RC practice & tier 1 instruction to allowed for more or an exemplary project that supports CARES
10/16/2022 21:53:47	TIME to develop as a community. I feel like the Lyon Village families are assuming that our student body is homogeneous, when in fact, there are days where we feel like a Title I school.	CARES -- being a good/nice/caring/decent/kind kid.	A guarantee that it would require no additional time on my part.
10/22/2022 15:34:46	To cultivate a respectful, caring, giving community.	To understand the value of making connections and contributing to their school and broader community.	Time to engage students in collaborative projects to give back to the community.
10/24/2022 14:52:19	For students to be well rounded good citizens.	To have empathy for others.	Some sort of school wide curriculum or series of annual activities.

10/28/2022 8:51:46	bullying, teasing, name calling, being mean-- this is something we are seeing across 4th grade each year. This year kids are using "gay", "chinese looking" and things like that as insults. Last year, students laughed in my class when a student tried to jokingly bring up Adolf Hitler. As a teacher who is Jewish and believes that we need to educate in order to stop hateful rhetoric, I often end up pausing lessons to discuss the effects and ramifications that these "jokes" have, but I am only one person. I think if we were to focus our exemplary project on becoming upstanding citizens and community members then we might see this decrease. Students currently see memes, and celebrities who promote hateful rhetoric (i.e. Kanye West) and they think these things are just "memes" and not how it affects real people, cultures, and society. We are a "no place for hate" school, but it is usually just 1 activity a year... the kids aren't being ingrained with this. We are living in a time where the media is so fast moving and kids are taking in one thing and going to the next so quickly without really understanding it. I think it would be important that students get educated on current events, on historical significances, and work against hatred. I know this is something I am passionate about, which is why I wanted to lead the CARES Committee...but I think we could push this further as a whole school if our Exemplary Project was based on citizenship.	to be global citizens who are respectful, accepting, and supportive to all cultures and peoples	The whole school would need to be on board and we would need funds/resources to kickstart any projects

10/28/2022 8:54:34	I already filled out this application with a giant message, but I just noticed that another school follows ADL for their exemplary project...that is EXACTLY what I would love to do. Anti-Defamation League is really amazing. Highly highly suggest that we use Oakridge's MOSAIC project as an example of a Exemplary Project that is really impactful and powerful.		
11/1/2022 16:30:54	Many opportunities for hands on project based and student directed learning	to be compassionate, self motivated to learn, and have the grit so they can achieve their goals.	time to plan and physical support in classes of students with high needs
